Customer Reviews

Contact the publisher if you want to buy one copy for your own use at \$30 +S&H. I laid out the book as part of my job at Missouri State University and both authors were working there when they wrote the book. We are very proud of it.

I "had" to purchase this book for my enology class. This book is a 5 x 7 spiraled paperback not worth more than \$15.00 and the seller is selling it new for \$99.00 plus shipping and handling. It's not worth the money and most of the information can be found for free on the internet or through better books. I believe the reason it's so high is because no one else is selling the book. I went to many sites but couldn't find it and so the price is jacked up here. If you are buying for your own personal knowledge don't - if you're a VESTA student you should complain.
