The Other End Of The Leash: Why We Do What We Do Around Dogs

Synopsis

The Other End of the Leash shares a revolutionary, new perspective on our relationship with dogs, focusing on our behavior in comparison with that of dogs. An applied animal behaviorist and dog trainer with more than twenty years experience, Dr. Patricia McConnell looks at humans as just another interesting species, and muses about why we behave the way we do around our dogs, how dogs might interpret our behavior, and how to interact with our dogs in ways that bring out the best in our four-legged friends. After all, although humans and dogs share a remarkable relationship that is unique in the animal world, we are still two entirely different species, each shaped by our individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (like wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. The Other End of the Leash demonstrates how even the slightest changes in your voice and the way you stand can help your dog understand what you want. Once you start to think about your own behavior from the perspective of your dog, you'll understand why much of what appears to be doggy-disobedience is simply a case of miscommunication. Inside you will learn:

- How to use your voice so that your dog is more likely to do what you ask.
- Why "getting dominance" over your dog is a bad idea.
- Why "rough and tumble primate play" can lead to trouble—and how to play with your dog in ways that are fun and keep him out of trouble.
- How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than "alphawannabees!"

In her own insightful, compelling style, Patricia McConnell combines wonderful true stories about people and dogs with a new, accessible scientific perspective on how they should behave around each other. This is a book that strives to help you make the most of life with your dog, and to prevent problems that might arise in that most rewarding of relationships. From the Hardcover edition.

Book Information

Paperback: 246 pages

Publisher: Ballantine Books; Reprint edition (2003)

Language: English

ISBN-10: 034544678X

ISBN-13: 978-0345446787

Product Dimensions: 5.4 x 0.6 x 8.2 inches

Shipping Weight: 9.6 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars [See all reviews](#) (649 customer reviews)

Customer Reviews

"The other end of the leash" is a book that could easily disappoint the purchaser if they did not know what they were buying. This is not a book on the practicalities of how to train your dog. Ms McConnell does not tell you how to make spot sit, down or fetch, or tell you how to teach him competition obedience. It is also not a book on the theory of teaching dogs, or on fixing behavioural problems. You will not hear about the benefits of positive reinforcement versus punishment in this book, or learn how to stop your dog from chasing the postman. However, if you accept this book for what it is, it is truly wonderful and quite unique. "The Other End of the Leash" is simply an informal discussion on the similarities and differences between canine and human communication.

McConnell has studied human behaviour as well as dog behaviour, and has come to the conclusion that many behaviours and verbal tones that seem friendly and natural to humans are aversive to our canine companions. When used inappropriately, these human signals can trigger a fearful or aggressive reaction in dogs. Less seriously, using inappropriate body language or vocal tone can undermine our obedience work. When teaching a recall for example, signals that might seem appropriate to a human (leaning forward, looking directly at the dog and barking a loud cheerful "come!") can in fact inhibit the dog from approaching. This book also contains one of the most sensible discussions of dominance that I have ever read. McConnell contends that dominance is a much misused but still useful concept. She discusses the way that we can mistakenly give up our "Alpha" status to our dogs by using the wrong body language, and explains the severe behavioural problems that can be caused when we do this.
